

DATASHEET

The conventional process of managing food service provision to a large number of people has proven to be very tedious, due to a large amount of 'loose' processes and paperwork. Traditional standard practice still commonly uses the basic cash register and handle transactions individually.

Such processes use paper vouchers or via signing of a log book which have proven hard to undertake decisions, planning, forecast, monitoring or evaluation of the overall process chain which are all ineffective.

Processes that involve provisioning services to a large number of people come with a wide range of challenges and if not taken into consideration can lead to major losses.

With our MARCATO, the operations can be made simple, with an easy-to-use interface that provides useful reports on a daily basis. Our system is proven to be able to help to eliminates or reduces:

- Human errors in Accounting and Ordering
- Fraud in handling cash – cash transaction only happens at main cashier
- Unnecessary waiting time during ordering

We helps customer to improve tremendously in:

- Efficiency by reducing time and cost of planning
- Significantly increases customer satisfaction = Happy Customer = Increase in 'unconsciously' spending
- Schedule promotions in the system
- Monitors and analyzes food usage to prevent wastage
- Update new menu and promotion to customers effectively
- Generates reports for analysis – for many usage such as promotion

Paperless

Replace the paper vouchers

Boost Operation

Cut on throughput time of catering process
